Analysis on Emerging Technology Skills and Trends

Fahad Muhammad

16/08/2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Job Market analysis and trend analysis
- To get actionable insights, I perform
 - Data Gathering
 - Data Cleaning
 - Data Analysis
 - Data Visualization
- Different sort of findings are achieved
 - Which programming language is most popular
 - Use of Highest DB
- Survey is conducted to observe which gender is max respondents in USA

INTRODUCTION

- This project is designed for data analysis and prediction of trends related to programming languages, dbs, platforms and web frames.
- Stack Overflow's annual Developer Survey is the largest and most comprehensive survey of people who code around the world.
 - Results don't represent everyone in the developer community evenly.
 - Nearly 90,000 developers.
 - Trends to predict where the developers are going.

Target Audience : HR managers, IT professionals, etc.

METHODOLOGY

- **Data Collection**
 - Various methods are used (Web Scraping, APIs, Request library)
- **Data Wrangling**
 - Cleaning, handling missing values, remove inconsistencies
- **Exploratory data analysis**
 - Analyzing data distribution, Handling outliers, Correlations
- **Data Visualization**
 - Highlight distribution of data, relationships, the composition and comparison of data.
- **Dashboards**
 - Pivot charts

RESULTS

PROGRAMMING LANGUAGE TRENDS

- JavaScript seems to keep as leading language.
- Python fastest-growing.
 - More demand than SQL next year
- Great interest in TypeScript

DATABASE TRENDS

- MySQL as most used database
- Lack of interest in Microsoft SQL Server and SQLite
- Increasing interest in PostgreSQL and MongoDB.
- New Tools are Redis and Elasticsearch

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript seems to keep as leading language.
- Python fastest-growing.
 - More demand than SQL next year
- Great interest in TypeScript

Implications

- Python is getting more attention
- Possible developers migration from JavaScript to TypeScript.
- SQL is most relevant language and will be used more and more industry professionals

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL as most used database
- Lack of interest in Microsoft SQL Server and SQLite
- Increasing interest in PostgreSQL and MongoDB.
- New Tools are Redis and Elasticsearch

Implications

- SQL is still a top tool
- Microsoft SQL Server and SQLite losing ground in the market.
- PostgreSQL and MongoDB establishment in the market
- Open source DBs are on demand

DISCUSSION

- How do we recover the gender gap in the technology sector ?
- Education just uptill Bachelors is ok or should we go beyond; MS/PhD?
- How to promote education and skills in lesser developed regions ?
- What about future trends, how to cope with them ?

OVERALL FINDINGS & IMPLICATIONS

Findings

- Education level in the IT field is just Bachelors
- Youngsters with age lesser than 40 are working in IT fields
- JavaScript widely used and TypeScript getting popular.
- Over 90% young male developers.
- Developers mostly located in developed countries.

Implications

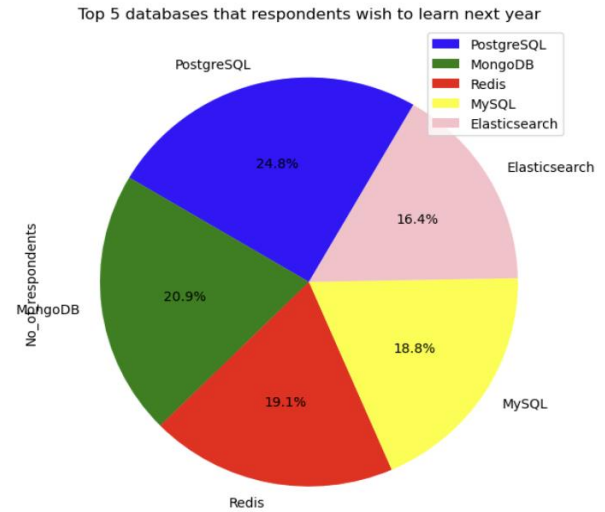

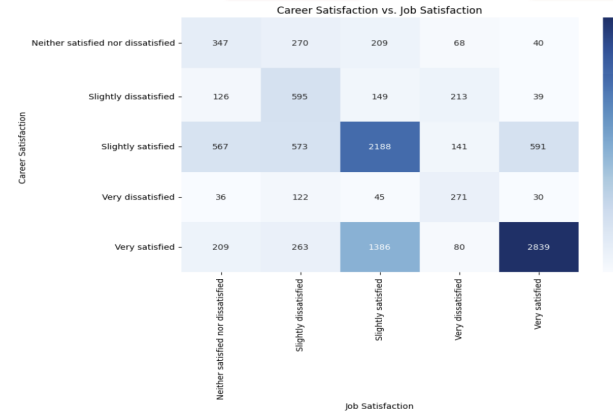

- With SQL, NoSQL should also be focused and adopted
- Web development is still on demand
- JavaScript and TypeScript web frames gaining followers.
- Global polarization of developers location and gender.
- Young developers without postgrad studies on its majority.
- Less developed countries need more training and education programmes

CONCLUSION

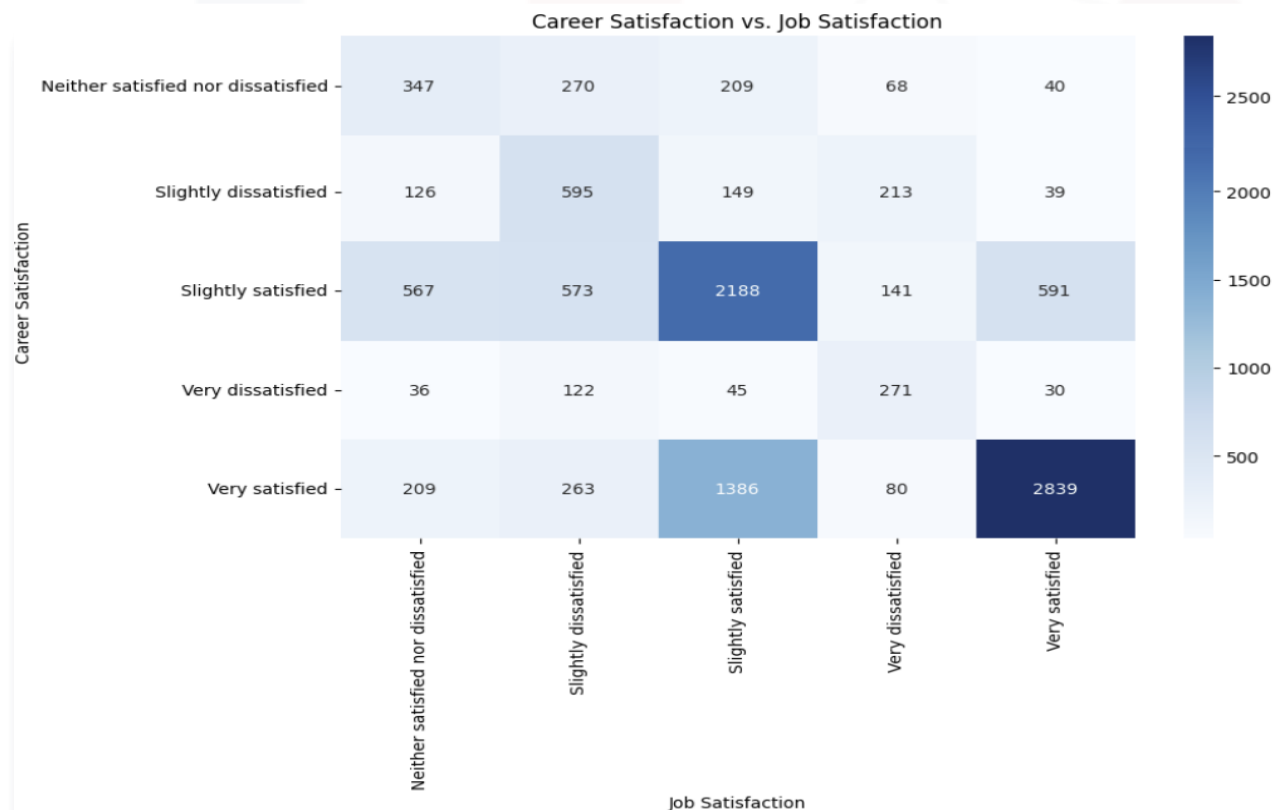

- Trends and technology is keep on changing, one must stay uptodate
- IT jobs are common in young guys with only bachelor education , more education can be achieved to go for research oriented jobs
- Less developed countries should not be ignored, more training should be promoted
